

#### **Caesar Groep**

**Luc Spaas** CEO Caesar Groep

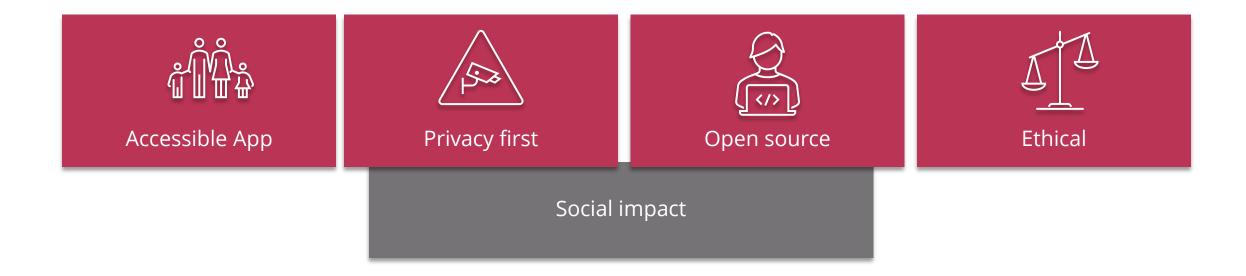

# Yivi - Caesar Groep collaboration

- Former Caesar employee and Founder of Ver.id: Roger Olivieira introduced us.
- Q2 2024: Caesar Groep performed extensive research in product, market, law and regulations.
- Q3 2024: Formalized with Privacy By Design Foundation, started Yivi by Caesar.
- What Caesar Groep will bring:
  - Business case driven
  - Track record on development, data analytics and new technology.
  - Continuity and development
  - Belief in ecosystems.

#### **Fundamentals for success**

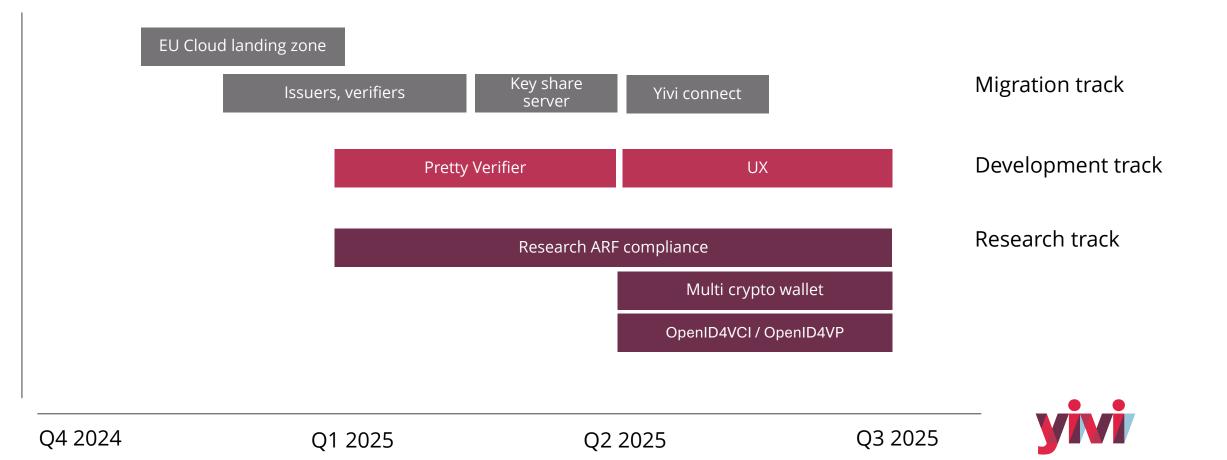

### The road to success

We want to work with a digital identity because we want to improve performance

| Trustworthy           | Selective         |  | Due date performance   |  |
|-----------------------|-------------------|--|------------------------|--|
| Efficient & effective |                   |  |                        |  |
| Prerequisites         |                   |  |                        |  |
| Law & re              | Law & regulations |  | Privacy first & secure |  |

# **Concept roadmap**

## **Research ARF compliance**

- Our assumptions:
  - Zero knowledge proofs is the right technology but lacks wider adoption.
  - Idemix will not be part of the ARF and SOG-IS list.
  - BBS+ discussion is stalled and will not make it into the ARF.
- Yivi will support multi crypto in the future
  - Moving from Idemix to ECDSA or alternative with the best privacy implementation.
  - Innovating with Post Quantum crypto (Radboud University)
- Yivi will adopt community standards in the future
  - OpenID4VP and OpenID4VCI

#### **Why Pretty Verifier?**

## **Pretty Verifier ideas**

- Phased implementation:
  - 1. A warning will be shown at first for non verified relying parties/verifiers.
  - 2. Cost price per attribute will be determined, verifiers will need to specify desired attributes.
    - Issuers will be compensated for their costs.
    - Points of attention: cryptographic implementation, counting of transactions.
  - 3. Continuation:
    - Self service portal for issuing and verification.

Hoe controleren we? Hoe controleren we organisaties?  $\times$ Organisaties die Yivi inzetten, kunnen door ons gecontroleerd worden. Hier een duidelijke uitleg geven waarom het niet verplicht is. Welke controles voeren wij uit? Wij vragen periodiek aan organistaties om:

- Registratie bij Kamer van Koophandel
- Contactpersoon voor zus
- Audit van zo.

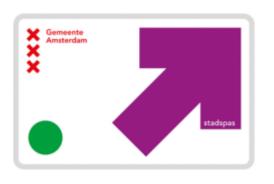

#### Wat kunt u met deze informatie?

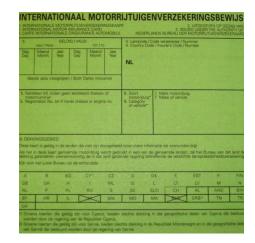

- Als de organisatie gecontroleerd is, kunt u uw gegevens veilig delen.
- Als de organisatie niet gecontroleerd is, raden wij u aan eerst bij de organisatie te informeren of het verzoek klopt. Gebruik daarvoor de link die getoond wordt.

Intern

#### **UX ideas**

- Wider adoption needs UX improvements.
  - Categorizing attributes
  - Custom reordering of attributes.
- Organizations must be able to integrate their own brands/visualizations.
  - Stadspas, Groenekaart, Aansluiting, etc..

# **Yivi Community**

- The ID-Wallet adoption wave is building up. eIDAS 2.0 regulation is pushing the market.
- Collaboration is key for success; we need to work together.
  - Technical level; what data to we need.
  - Business level; what use cases do we implement.
- The tech community plays a huge role in the adoption of Yivi.
- What should we do to promote Yivi as the most reliable wallet in the Netherlands?
